

Application No. 10/822,057  
Applicant: Robert J. Tynik  
Supplemental Preliminary Amendment

REMARKS

Applicant respectfully requests reconsideration and allowance of this application in view of the amendments above and the following comments.

This amendment is supplemental the preliminary amendment filed with the application. This amendment is intended to correct an inadvertent error in the previous amendment. Claim 11 is amended to recite that molybdenum may be part of the markush group, as per the originally filed version of the claim. This is consistent with the corresponding PCT application, in which this claim was found by the examiner in the Written Opinion to have inventive step. New claims 24-26 are added, which are parallel to claims 11-13, but which recite the structure of the organoammonium salt.

Early and favorable action is earnestly solicited.
